DESIGNMOOD

A man with curly hair, wearing a black t-shirt and black shorts, is walking away from the camera in a modern building hallway. He is walking on a light-colored tiled floor. A large glass wall on the right side of the hallway reflects his image. In the background, other people are walking in the same direction. The building has a modern design with large windows and a checkered pattern on the upper walls. The overall atmosphere is bright and modern.

- The governing sizes and weights are subject to usual variations expected of fired ceramic productions.
- Slight variations of shades/colours and surface finishes are inherent due to the nature of ceramic tile production process.

R-RATING SLIP RESISTANT

Floor tiles these days are given an anti slip rating. This rating comes in the form of an 'R' value (Ramp test) with a scale from R9 to R13 (R9 having the least slip resistance and R13 the highest slip resistance).

CLASSIFICATION	R9	R10	R11	R12	R13
SLIP ANGLE	6-9 DEGREE	10-18 DEGREE	19-26 DEGREE	27-34 DEGREE	>35 DEGREE
WET SLIP RISK	HIGH RISK	MODERATE	MODERATE	LOW RISK	LOW RISK
AREA OF USE	DRY AREA	OCCASIONAL WETNESS	OUTDOOR ENVIRONMENT	WET/OUTDOOR ENVIRONMENT	VERY WET COMMERCIAL AREA

- **R9** : For internal dry area usage.
- **R10** : For internal area with occasional spill or wetness (need constant cleaning/drying) : kitchens and bathrooms.
- **R11** : For internal usage with constant spill or wetness (require continous cleaning and drying effort).
- **R12** : For external usage (works in dry and wet situation with cautions).
- **R13** : For external usage with other contaminant (such as oil).

SHADE VARIATIONS

Shade variations are the characteristic of the tile that deliberate and visible differences in graphics and colour hue. Digital Tecnica technology creates stunning porcelain tiles with hyper-realistic surface tones, markings and textures which mimic a range of natural materials including; stone, timber, terracotta, cement, mosaic, marble and more.

- **V1** : Differences among pieces from the same production run are minimal.
- **V2** : Clearly distinguishable differences in texture and/or pattern within similar colors.
- **V3** : Amount and intensity of colors on each piece may vary significantly.
- **V4** : Random color differences each tile, so that one tile may have totally different colors from other tiles.
